- Most important stop = _____
- What do you notice about the islands?
- Do you think the island species would be the same? Explain.

Objective A) Identify Darwin and summarize his studies.

- Which two species and traits were the key focuses of his studies?
- Why are there so many varieties that appear related?
- Why did they evolve?

Analysis of Adaptations

Discovery *Life* Video Worksheet

While watching the *Life* video, many different organisms will be discussed. Complete the table below identifying at least 5 different organisms, their adaptation/s, and how it helps them to survive. *** Extra Credit Option. There are two extra spaces. If you choose to identify more than five organisms, you can earn an extra credit point for each extra organism.

Name of Organism	Adaptation	How does it help them to survive or reproduce?
1.		
2.		
3.		
4.		
5.
