## Cellular Respiration

## Chapter 9

Pages 220-232
A) Define calorie
A) Relate glucose to ATP
\&) Define respiration and write the chemical formula formula

+ D) Summarize the location, reactants and products of the three stages of respiration
- E) Summarize what happens when there is a
* F) Summarize how energy is used in the short term and the long term
* G) Compare respiration to PSN

products of the three stages of respiration <br> <br> D) Summarize the location, reactants an
products of the three stages of respiration <br> Girls Kick Every Thug's Crack}

D) Summarize the location, reactants and products of the three stages of respiration

## Glycolysis

## Produces 2 molecules of pyruvic acid

Products (3 of them):

1. 2 ATP $=$ Net Profit
2. 2 NADH = ETC energy, e- carrier
3. 2 Pyruvic Acids
D) Summarize the location, reactants and products of the three stages of respiration Where? Krebs Cycle: AKA citric Acid Cycle Mitochondria

## Reactants?

Pyruvic Acid

## Products:

$\mathrm{CO}_{2}$
4 NADH $=\mathrm{e}-$ carrier $1 \mathrm{FADH}_{2}=\mathrm{e}-$ carrier

D) Summarize the location, reactants and products of the three stages of respiration

## Electron Transport Chain

Electron
Where?
Mitochondria Reactants?

2 NADH
$\mathrm{FADH}_{2}$
Products?
$\mathrm{H}_{2} \mathrm{O}$
ATP

Channel

ATP
Synthase

ATP Production
C) Summarize the three stages of cellular respiration

## E) Summarize what happens when there is a lack of <br>  <br> E) Summarize what happens when there is oxygen Lactic ACid Fersfentelt Products: 1. 2 Lactic Acids 2. 2 NAD $+=$ e- carrier So se <br> E) Summarize what happens when there is oxygen Lactic ACid Fersfentelt Products: 1. 2 Lactic Acids 2. 2 NAD $+=$ e- carrier So se <br>  <br>  <br>  <br> E) Summarize what happens when there is oxygen Lactic ACid Fersfentelt Products: 1. 2 Lactic Acids 2. 2 NAD $+=$ e- carrier Sore <br> E) Summarize what happens when there is oxygen Lactic Acjol Fermentitif instead of Krebs after Guy Products: 1. 2 Lactic Acids 2. 2 NAD $+=\mathrm{e}$ - carrier $\begin{aligned} & \text { Muscle } \\ & \text { Glucose }\end{aligned}$ <br>  <br>     <br> $\qquad$ <br>  <br>  <br> <br>  <br> <br>  <br> \title{  

 <br>  <br>  <br> $\qquad$ <br>  <br>  <br>  <br>  <br>  <br> <br> LECijC AGiO एefffentelijof= <br> <br> LECijC AGiO एefffentelijof= <br> <br> Hectic AGiO Fefffenteltiof= <br> <br> Hectic AGiO Fefffenteltiof= <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br>  <br> <br> <br> holealo 1 ald es ellen Givcolys <br> <br> <br> holealo 1 ald es ellen Givcolys <br> <br> <br> holealo 1 ald es ellen Givcolys Sore muscles Sore muscles Sore muscles <br> <br> <br> <br> -ark <br> <br> <br> <br> -ark <br> <br> <br> <br> -ark <br> <br> <br> <br> -ark <br> <br> <br> <br> -ark} <br> <br> <br> <br> -ark} <br> <br> <br> <br> -ark} <br> <br> <br> <br> -ark}
F) Summarize how energy is used in the short term and the long term
co

- Quick Energy = intense exercise
First few seconds = ATP
- After this, lactic acid fermentation $=\sim 90 \mathrm{~s}$.
- Long Term Energy
- Long Term Energy (15-20 min.)
ث After this, stored molecules (fat) is burned

$$

$$ +

molecules
$\qquad$ $\sigma^{2}$
nc er

## D) Compare respiration and PSN

## PHOTOSYNIHESTIS

Make glucose
Give off $\mathrm{O}_{2}$
Use sunlight as energy
Use $\mathrm{CO}_{2}$

RESPIRATION
Break apart glucose
Use oxygen
Make cell energy
Give off $\mathrm{CO}_{2}$

## D) Compare respiration and PSN <br> Equation Comparison:

## Photosynthesis <br> $6 \mathrm{CO}_{2}+6 \mathrm{H}_{2} \mathrm{O}+\operatorname{sun} \rightarrow \mathrm{C}_{6} \mathrm{H}_{12} \mathrm{O}_{6}+6 \mathrm{O}_{2}$ <br> Respiration $\mathrm{C}_{6} \mathrm{H}_{12} \mathrm{O}_{6}+6 \mathrm{O}_{2} \rightarrow 36 \mathrm{ATP}+6 \mathrm{CO}_{2}+6 \mathrm{H}_{2} \mathrm{O}$ <br> Respiration $\mathrm{C}_{6} \mathrm{H}_{12} \mathrm{O}_{6}+6 \mathrm{O}_{2} \rightarrow 36 \mathrm{ATP}+6 \mathrm{CO}_{2}+6 \mathrm{H}_{2} \mathrm{O}$

## Reactants for PSN = Products of Resp.

 Reactants of Resp. = Products of PSN
## Answer the following questions from the video or your notes:

1.What is the formula of respiration?
2. List the three steps of respiration
3. How much total ATP is produced from respiration?
4. Why do gym trainers encourage individuals to work out for a minimum of 20 minutes?

[^0]:    $\qquad$
